Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Cancelled)

2. (Currently Amended) The method of claim ~~1~~ 8, wherein said at least one prearranged web document comprises a prearranged set of web documents.

3-4. (Cancelled)

5. (Currently Amended) The method of claim ~~1~~ 8, wherein said user web document and said prearranged web document both relate to the funeral industry.

6-7. (Cancelled)

8. (Currently Amended) ~~The method of claim 1,~~ A method for automatically generating a web document in real time comprising:

    providing at least one prearranged web document wherein said at least one prearranged web document is capable of being displayed on a computer using a web browser;

    providing a database with preprogrammed information;

    providing a form document;

    selecting user variables wherein said user variables are selected from said preprogrammed information using said form document; and

automatically generating a user web document in real time configured for display on said computer, wherein said user web document is generated based on said desired user variables, said user web document being electronically linked to said prearranged web document,

wherein said user variables are in a first language and said user web document is generated in a second language, wherein said first and second languages are spoken languages.

9. (Cancelled)

10. (Original) The method of claim 8, further comprising automatically determining said second language from said computer or said web browser.

11-18. (Cancelled).

19. (Original) A method for dynamically generating a web document in a second language comprising:

providing a database with preprogrammed information;

selecting desired user variables in a first language wherein said desired user variables are selected from said preprogrammed information; and

automatically generating a user web document, wherein said user web document is generated in a second language based on said desired user variables.

20. (Original) The method of claim 19, further comprising:

determining a character set from a computer of said user; and

determining said second language based on said character set.

21. (Original) The method of claim 19, wherein said first and second languages are spoken languages.

22. (Original) The method of claim 19, wherein said user web document relates to the funeral industry.

23. (Original) The method of claim 19, further comprising selecting said desired user variables using a form document.

24. (Original) The method of claim 19, wherein said step of automatically generating a user web document comprises automatically generating a user web document using computer software programmed in PHP.

25. (Original) The method of claim 19, wherein said second language is automatically determined based a web browser used by said user.

26-29. (Cancelled)

30. (Currently Amended) ~~The system of claim 26,~~ A system that automatically generates a web document in real time comprising:
 a database with preprogrammed information;
 a form document;
 user variables wherein said user variables are selected from said preprogrammed information using said form document; and
 a user web document that is capable of being displayed on a computer using a web browser, wherein said user web document is automatically generated based on said desired user variables,
 a desired spoken language that is selected from a choice of spoken languages for said form document, and said user web document is automatically generated in real time in said desired spoken language, wherein said user web document relates to the funeral industry.

31-32. (Cancelled).

33. (Currently Amended) The system of claim 26 30, wherein said user variables are in a first language and said user web document is generated in a second language.

34. (Original) The system of claim 33, wherein said first and second languages are spoken languages.

35. (Cancelled)

36. (new) A computer program product, tangibly stored on a computer-readable medium, for dynamically creating a web-based document in a spoken language from a web-based form document in a different spoken language, comprising instructions operable to cause a programmable processor to:

receive the web-based form document in a default spoken language, wherein the web-based form document comprises prearranged document template information;

automatically detecting a default spoken language for the web-based form document;

detecting one or more user variables that indicate a desired spoken language; and

dynamically creating the web-based document in the desired spoken language using the one or more user variables, wherein the web-based document is generated from the web-based form document according to the prearranged document template information.

37. (new) The product of claim 36, wherein the prearranged document template information comprises information associated with a funeral industry.

38. (new) The product of claim 37, wherein the product is configured to allow a user to create a web-based document comprising information for a deceased person in the desired spoken language.

39. (new) The product of claim 38, wherein when the web-based form document is changed, automatically updating the created web-based document.
